Future technology, Belgaum
- PCB Design Intern | 11/10/2022 to 30/10/2022.  
Electrosal Hi-Tech Pvt. Ltd. – Shripewadi.

## PROJECTS

---

### Automated Irrigation System using Raspberry-Pi

An automated irrigation system with Raspberry Pi detects soil moisture, triggers watering, and allows manual control via a web interface. It supports scheduling, water usage tracking, and weather integration. Alerts for low moisture and nutrition supplement.

### Fitness Tracker Web App – JavaScript, HTML5, CSS3.

The app allows users to track their daily steps and workout sessions. This ensures a detailed overview of their physical activities and helps them stay on track with their fitness journey. Users can set personalized fitness goals and receive progress updates. This feature helps in maintaining and adjusting workouts.

### To Do WebPage – HTML5, CSS3, JavaScript.

Users can quickly add, edit, and delete tasks with a simple interface. Completed tasks can be marked for easy tracking. The responsive design ensures smooth usage on different devices. Tasks are stored using Local Storage, so they remain available even after closing the browser.

## EDUCATION

---

- VSM's Somashekhar R Kotiwale Institute of Technology – Nipani, India | Bachelor of Engineering | Electronics and Communications Engineering, Expected in 05/2025.
- Smt. V P Hanchinmani Science P U College – Dharwad, India | 2018 – 2020.
